- Identification & Marking Solutions
- Cable Accessories

Pullman Electric Trade Mall

**PULLMAN
ELECTRIC**

About us

Since 1996, Pullman Electric has been recognized all over Egypt as a leading supplier of quality products for panel equipment, installations, cable accessories, identification & marking solutions.

BUSINESS STRATEGY

Pullman Electric team concentrates on presenting products & services with high quality and supports all customers' needs. Our advantage begins with management, R&D, sales team and ends with our customer. Based on user's feedback, we continually develop & update our products to meet actual customer's demands. Our close working relationships with our customers allow us to stand with the growing markets trends.

All our products are evaluated & qualified with standard certificates and meet different approvals such as UL, CSA, VDE, CE and others.

WHY CHOOSE US?

The product categories that Pullman Electric covers include the following:

- Panel equipment & installations:

[wiring terminals, terminal blocks, signaling devices, busbar isolators, busbars, standard cable ties, braided sleeves, rubber glands, heat shrink, thermal management solutions, measuring instruments, timers and cable protection & insulation].

- Cable accessories:

Wire nuts, connectors, cable glands, UV cable ties, stainless steel cable ties, cable lugs & termination kits.

- Identification & marking solutions:

[Thermal printers, Multi- color printers, cut & auto half cut printers]

PULLMAN ELECTRIC has a safety sign and label maker featuring "All-In-One" capability.

Print custom signs on demand and in-house. Our printing machines are a cost and time efficient label printers.

Make exactly the label you want, when you want it.

The unique plotter cutter on the machine allows one to create custom signs of any shape and size.

Using Pullman Signs & Marking Solutions facilitates time and cost saves and improves your work process.

APPLICATIONS

- ELECTRICAL IDENTIFICATION.
- INDUSTRIAL IDENTIFICATION.
- MECHANICAL & PIPE IDENTIFICATION.
- DATA & TELECOMMUNICATION IDENTIFICATION.
- ANSI and OSHA standards required signage - Control Panels - Switch Boards - Wire Marking/Wire Identification - Terminal Blocks marking - Health & Safety Signs - Product & Asset Labeling - Visual Management Signs- Pipe Marking / GHS Labels - Custom Labels

Below Characters is applied for the cable ties made from Nylon 66, except for extra mentioned

Material:

Natural: Polyamide 6.6 natural
 UV Black: Polyamide 6.6 + carbon black
 Colors: Polyamide 6.6 natural + Colorant
 * Flammability of raw material : UL 94 - V2
 - Humidity absorption: 2.7% - 2.8% (23°C -50%RH)
 * Working (Operation) Temperature: -40°C - + 85°C (-40°F - + 185°F)
 * Min Installation Temperature: -10°C (14°F)
 - Max sustainable temperature for short time: +110°C (230°F)
 * Good resistance to bases, oils, greases, oil derivatives, chloride solvents.
 Limited resistance to acids. Not resistant to phenols.
 - REACH, ROHS, PAHS Compliance.

Standard Cable Ties

*** Material:**

Natural: Polyamide 6.6 natural
 UV Black: Polyamide 6.6 + carbon black
 Colors: Polyamide 6.6 natural + Colorant
 * Flammability of raw material : UL 94 - V2
 * Humidity absorption: 2.7% - 2.8% (23°C -50%RH)
 - Working (Operation) Temperature: -40°C - + 85°C (-40°F - + 185°F)
 * Min Installation Temperature: -10°C (14°F)
 * Max sustainable temperature for short time: +110°C (230°F)
 - Good resistance to bases, oils, greases, oil derivatives, chloride solvents.
 Limited resistance to acids. Not resistant to phenols.
 - UL (Underwriters Laboratories) : File E258930 based newest standard UL62275
 * TUV Approval: EN62275:2015
 * REACH, ROHS, PAHS Compliance.

Heavy-Duty Cable Ties

*** Material:**

Natural: Polyamide 6.6 natural
 UV Black: Polyamide 6.6 + carbon black
 Colors: Polyamide 6.6 natural + Colorant
 * Flammability of raw material: UL 94 - V2
 * Humidity absorption: 2.7% - 2.8% (23°C -50%RH)
 * Working (Operation) Temperature: -40°C - + 85°C (-40°F - + 185°F)
 * Min Installation Temperature: -10°C (14°F)
 * Max sustainable temperature for short time: +110°C (230°F)
 - Good resistance to bases, oils, greases, oil derivatives, chloride solvents.
 Limited resistance to acids. Not resistant to phenols.
 * UL (Underwriters Laboratories) : File E258930 based newest standard UL62275
 * TUV Approval: EN62275:2015
 * REACH, ROHS, PAHS Compliance.

APPLICATIONS

Electrical installations.
 * Industrial wiring.
 * Automotive.
 * Panel building.
 * Special applications.

BENEFITS

* Exclusive product (patented).
 * Higher mechanical performances.
 * Low insertion effort.
 * Minimum installation temperature (-40°C).
 Rounded edges for the safest application.
 * Resealable and recyclable bag.

APPLICATIONS

* Electrical installations.
 * Industrial wiring.
 * Automotive.
 * Panel building.

BENEFITS

* Bent rounded tip for an easier insertion through the head of the cable ties.
 * Rounded edges for the safest application.
 * Low friction coefficient of the material.

APPLICATIONS

* Photovoltaic installations.
 * Outdoor installations.
 * Industrial wiring.

BENEFITS

* Excellent resistance to UV rays.
 * Bent rounded tip for an easier insertion through the head of the cable ties.
 * Rounded edges for the safest application.
 * Suitable for photovoltaic installations.

High Temperature Resistant Cable Ties

- * Material:
Natural: Polyamide 46 natural
UV Black: Polyamide 46 + carbon black
- * Flammability of raw material: UL 94 - V2
- * Humidity absorption: 2,7% - 2,8% (23°C -50%RH)
- * Working (Operation) Temperature: -40°C - + 130°C (-40°F - + 266°F)
- * Min Installation Temperature: -10°C (14°F)
- * Good resistance to bases, oils, greases, oil derivatives, chloride solvents.
Limited resistance to acids. Not resistant to phenols.
- * REACH, ROHS, PAHS Compliance.

APPLICATIONS

- * Automotive (engine compartment).
- * Use at high temperature.
- * Industrial wiring.

BENEFITS

- * Excellent resistance to high temperatures.
- * Bent rounded tip for an easier insertion through the head of the cable ties.
- * Rounded edges for the safest application.

Metal Detectable Cable Ties

- * made of detectable nylon (PA66) compounds (the "Products")
These products are intended for use in the proximity of food processing, handling, and packaging operations. In addition, these products are used for cable management on food processing and packaging equipment, and inside electrical control panels found in food processing and packaging operations

APPLICATIONS

- * To fix wires in electrical equip in food industries, pharmaceutical and wherever there is a risk of contamination by external agents [Directive HACCP].
These cable ties are not suitable for food contact.

BENEFITS

- * Material easily detectable by metal detectors, X-rays and visually.
- * Bent rounded tip for an easier insertion through the head of the cable ties.
- * Rounded edges for the safest application.

Magic Cable Ties

LINKED PRODUCTS
Tools for cable ties, see pages 80

- * Self-locking head and body design
- * Provides a fast and easy way of application
- * Material: Hook: Nylon, Loop: Polyester, Base: Synthetic Resin
- * Color available: Black, Green, Yellow, Red, Blue, White
- * Melt temperature: Hook: 230°C, Loop: 180°C
- * Working (Operation) Temperature -40°C - + 85°C (-40°F - + 185°F)
- * Min Installation Temperature: -20°C (0°F)

Remarks: the tensile strength will be increased under the cold temperature, but the durability will be reduced.

- * Water resistant: it could be used under the water, the tensile will be reduced 50%, but after dry it, the tensile will be recovered.
- * Chemical Resistant: Alkaline Soda (50%), Ammonia (28%), Hydrochloric Acid (2.5%), Nitric Acid (3.5%), can be still worked.
- * Tensile Strength: 1x1cm connection: 25N (5.6lb), Peeling force: 1x1cm connection: 3N (0.67lb)

APPLICATIONS

- * Electrical installations.
- * Photovoltaic installations.
- * Industrial wiring.
- * Heavy-duty applications.
- * External applications.

BENEFITS

- * Highly withstands climatic changes, also in sea-areas.
- * Excellent resistance to UV rays.
- * Can be used in temporary position, which allows the re-opening.
- * A very practical box that can easily be hung to your belt. Its convenient upper opening, very easy to be reclosed, allows the quickest picking-up of the product and the best protection from dust.

Extern Cable Ties

* Material: Polyamide 12, Polyamide 6.6 or Polyamide 6.6 in High Impact Grade
High Impact Grade Polyamide 6.6, is an unreinforced, super tough for injection molding and extrusion, it offers outstanding impact resistance over a wide temperature and humidity range.

APPLICATIONS

- Electrical installations.
- Industrial wiring.
- * Automotive.
- * Panel building.
- * Special applications where a high resistance is required.

BENEFITS

- * Hard to release.
- * Limited insertion effort.
- * Rounded edges for the safest application.
- * Bent rounded tip for an easier insertion.
- * The cable ties can be closed by hand. Without the dedicated tool

Marker Cable Ties

Material: Polyamide 6.6

APPLICATIONS

- * Electrical installations.
- * Industrial wiring.
- * Automotive.
- * Panel building.
- * Special applications.

| Item No. | SIZE (MM) | Tensile Strength | Min Bundle Diameter (mm) | Max Bung Diameter (mm) | Min Bundle Diameter (in) | Max Bundle Diameter (in) |

Cable Ties Mounts Pad in Nylon

- * Material: Polyamide 6.6
- * 3M adhesive is available upon special request.
- * Can be screwed if without adhesive

Cable Ties Mounts Pad in ABS

- * Material: Acrylonitrile Butadiene Styren

Adhesive Cable Clamp

- * Material: Polyamide 6.6
- * 3M adhesive is available upon special request.

Cable Ties Screw Mount

- * Material: Polyamide 6.6

CABLE CLAMPS

- * Material: UL approved
NYLON 66, 94V-2

PUSH TIE MOUNT

- * Material: UL approved grey
NYLON 66, 94V-2

Cable Ties Mount Plug

- * Material: Polyamide 6.5

BALL LOCK TYPE STAINLESS STEEL CABLE TIES

Self Locking Ball Type Stainless Steel Cable Ties provides a strong durable bundling and fastening. Low weight, high strength of roller ball are designed for use in application where strength, vibration, weathering corrosion extremes are a factor.

Available in Grade 316 & 304 Coated or Un-coated in 4.6 mm and 7.9 mm widths and various lengths

The normal operating range for the roller ball uncoated ties version is -80°C to $+538^{\circ}\text{C}$ approximately

For coated version normal operating range is -80°C to $+150^{\circ}\text{C}$.

it is available in wide choice of colors

MINIMUM LOOP TENSILE STRENGTH

4.6 mm width Un-coated - 130 lbs

4.6 mm width Coated - 110 lbs

7.9 mm width Un-coated - 270 lbs

7.9 mm width Coated - 200 lbs

Ball Lock Type Cable Ties are also available in widths of 12 mm and 16 mm with various lengths for special requirements

Intermediate lengths are available on demand for special requirements

TECHNICAL DETAILS

Type: Roller Ball Un-coated
Width: 4.6 mm and 7.9 mm
Material: S 304 & S 316

Type: Roller Ball Coated
Width: 4.6 mm and 7.9 mm
Material: S 304 & S 316

LADDER TYPE STAINLESS STEEL CABLE TIES

Ladder Type Stainless Steel Cable Ties are as strong as Ball Lock type Cable Ties,

The unique locking design on the strip can be applied without any crimping tool.

The Ladder type ties are designed for self locking fast and easy application

Available in Grade 316 & 304 Coated or Un-coated,

in 7mm and 12 mm widths and various lengths.

Normal operating range for uncoated ties is -80°C to $+538^{\circ}\text{C}$ and fully coated ties is -80°C to $+150^{\circ}\text{C}$.

it is available in wide choice of colors

Coated ties are recommended for resistance of corrosion, chemical and weathering

MINIMUM LOOP TENSILE STRENGTH

width - 100 lbs 7 mm

mm width - 200 lbs 12 mm

Intermediate lengths are available on demand for special requirements

Mentioned products are also available in material SS 304, use 304 instead of 316 in Product Code e.g.

7LTU-316-100 shall be 7LTU-304-100

Type: Ladder type Un-coated

Width: 7 mm and 12 mm

Material: SS 304 & SS 316

Type: Ladder type Coated

Width: 7 mm and 12 mm

Material: SS 304 & SS 316

TECHNICAL DETAILS

Type: Ladder type Un-coated
Width: 7mm and 21 mm
Material: S 304 & S 316

Type: Ladder type Coated
Width: 7mm and 12 mm
Material: S 304 & S 316

RELEASABLE TYPE STAINLESS STEEL CABLE TIES

Releasable Type Stainless Steel Cable Ties provides easy and quick installations because of its unique design with buckle.

Fasten-unfasten-refasten means greater flexibility with Releasable type Cable Ties

The normal operating range for the uncoated ties version is -40°C to $+325^{\circ}\text{C}$

approximately. For coated

version normal operating range is -60°C to $+170^{\circ}\text{C}$

It is available in wide choice of colors. Coated ties have better weathering properties with excellent resistance to corrosion, radiation and abrasion

Intermediate lengths are available on demand for special requirements

TECHNICAL DETAILS

Type: Releasable Coated and Un-coated
Width: 5 mm and 10 mm

Material: SS 304 & SS 316

MINIMUM LOOP TENSILE STRENGTH

width Un-coated & Coated - 400 lbs 5 mm

width Un-coated & Coated - 500 lbs 10 mm

STAINLESS STEEL BANDS

Designed for quick installation, highest clamping force and gap-free inside diameter. The best choice for demanding applications!

- Apply 3-5 times faster than band and buckle hand tools
- Unique lock formed under full tension maximizing tightness
- 201 SS band provides greater material strength allowing tighter clamps and can be double wrapped for additional strength
- 3/4" band available in plastic totes
- Application Tool: UL4000-D cordless

Braided Sleeve Products

GENERAL PURPOSE

For general bundling & protection in office, commercial, & industrial applications, these products offer economical & varied solutions.

METAL / SHIELDING

EMI, RFI, & ESD shielding solutions

EXTREME TEMPERATURE

Designed for protection from high temperature environments where failure would be catastrophic, these products are state-of-the-art in high-temp material engineering.

HEAVY DUTY

For applications where protection from abrasion damage is a primary concern, this line of Techflex® products is the right solution for rugged, challenging environments.

ADVANCED ENGINEERING

Engineered from specialized polymers, designed to exact specifications, & manufactured to tight tolerances, these premium products are in use in many aerospace, military, & biomedical applications.

SPECIALTY

Techflex® specializes in providing highly engineered, application specific products to fulfill our customers' individual specifications.

EXPANDABLE BRAIDED POLYESTER SLEEVING "SERIES TSRI"

General features

The braided sleeving of the Series TSRI, made from single polyester strands, is particularly suitable for protecting electrical cables and wiring. It is flame-retardant, insulating, resistant to abrasion and to the marine atmosphere. This series is available in diameters ranging from 4 mm to 60 mm and upon special request diameters of up to 90 mm can be made available.

EXPANDABLE BRAIDED NYLON 66 SLEEVING "SERIES TS66"

General features

The braided sleeving of the series TS66 is made from monofilaments of NYLON 66 and is particularly suitable for applications in which good resistance to abrasion and to UV rays is required.

It is self-extinguishing and insulating and is available in standard diameters from 3 mm to 60 mm.

Other diameters up to a maximum of 150 mm are available upon request.

EXPANDABLE BRAIDED POLYESTER SLEEVING "SERIES TS800-RI"

UL94-V0 ACCORDING TO RAILWAY RULE EN 45545

General features

The braided sleeving of the Series TS800-RI, made from single polyester strands, is particularly suitable where a high degree of flame-retardance is required. It is insulating, resistant to abrasion and to the marine atmosphere and is mainly used for protecting electrical cables and wiring. The UL94-V0 characteristic can be recognised from the single strand of a different colour from that used for the sleeving which is inserted during its production. This series is available in diameters ranging from 4 mm to 60 mm. According to railway rule EN 45545

SILICON FIBREGLASS SLEEVING "SERIES GVS"

General features

GVS silicon fibreglass sleeving is particularly suitable for all uses in which good mechanical resistance, flexibility and temperature withstanding characteristics are required. It conforms to the thermal class C (250 °C) and also withstands peaks of temperature of up to 290 °C. It is produced with three values of standard voltage: 1500 V, 2500 V, 4000V.

SLEEVING IN FIBRE GLASS WITH EXTRUDED SILICON "SERIES GVS-UL"

General features

The sleeving in fibreglass with extruded silicon GVS-UL is particularly suitable for all situations in which good mechanical resistance, flexibility and resistance against particularly high temperatures are necessary. It complies with thermal class C (250 °C) and also withstands temperature peaks up to 290 °C. It is produced in 5 standard voltage values: 1500 V, 3000 V, 4000 V, 7000 V, 10000V

SLEEVING IN FIBRE GLASS WITH EXTRUDED SILICON "SERIES GVS-SIL"

General features

The sleeving in fibreglass with extruded silicon GVS-SIL is particularly suitable for all situations in which good mechanical resistance, flexibility and resistance against particularly high temperatures are necessary. It complies with thermal class C (250 °C) and also withstands temperature peaks up to 290 °C. It is produced in 5 standard voltage values: 1500 V, 3000 V, 4000 V, 7000 V, 10000 V

Flame - Retardant polyolefin tubing

◆ Features

Shrink ratio: 2:1
 Operating temperature: -55°C~125°C, -55°C~ 135°C
 Minimum shrink temperature: 70°C
 Minimum full recovery temperature: 110°C
 Very flexible, highly flame-retardant.
 Low shrink temperature
 Good thermal stability.
 UL224 E214175 125°C 600V VW-1
 AMS-DTL-23053/5 class 1 and class 3
 Conform to RoHS 2.0 ((EU)2015/863)

◆ Technical Data

| Property | Test method | Requirement |
|--|---------------------------------|--------------------------------|
| Longitudinal shrinkage | ASTM D 2671 | -10 % ~ 10 % |
| Tensile strength | ASTM D 638 | ≥10.4MPa |
| Ultimate elongation | ASTM D 638 | ≥200% |
| Aging 158°C168hrs | Tensile strength after aging | ≥70% of original |
| | Ultimate elongation after aging | ≥100% |
| Dielectric voltage withstand | UL224 | 2500V, 60sec no breakdown |
| Dielectric strength | ASTM D2671 | ≥19.7kV/mm |
| Volume resistivity | ASTM D 876 | >10 ¹⁴ Ω·cm |
| Heat shock <200°C, 4hrs> | ASTM D2671 | No cracking, flow, or dripping |
| Low temperature flexibility<-55°C, 4hrs> | ASTM D2671 | No cracking |
| Flammability | VW-1 | Pass |

◆ Color

Standard color: black, white, red, blue, yellow, green. Special colors are available upon request.

Non standard sizes are available upon request.
 Cut pieces available upon request.

Heat Shrinkable Busbar Insulation Tube

◆ Features

Shrink ratio: 2:1 (1kV&35kV) & 2.5:1 (10kV)
 Working temperature: -55°C ~ 125°C
 Shrink temperature: 84°C ~ 125°C
 Environmental, flexible, flame retardant, soft

◆ Technical Data

| Property | Standard | Test method |
|--------------------|---------------------|---------------------|
| Tensile Strength | Standard | GB/T 1040 |
| | ≥10.4(Before Aging) | 130°C *168hrs |
| Elongation | ≥7.3(After Aging) | GB/T 1040; GB/T7141 |
| | ≥300(Before Aging) | 130°C*168hrs |
| Breakdown Strength | No Cracking | GB/T 1408.1 |
| Tensile Strength | ≥25 | GB/T 1410 |
| Volume Resistivity | ≥1×10 ¹⁴ | GB/T 1410 |
| Flame Retardant | ≥30 | GD/T 2406 |

*This data is suitable for 10kv bus bar protection tube. When managing this test, the user must make the tube recovery evenly and make sure the max thickness>2mm, and bus-bar tubes are longer than 1200mm. **35kV bus bar off center proportion ≤ 50%.

We Are Proud To Be The Top Wire Terminal Choice For Thousands Of Electrical Contractors. No Matter What Kinds Of Electrical Terminals You Need, You Can Find The Ideal One From Our Extensive Selection Of Ring Terminals, Spade Connectors, Disconnects, Butt Splices And Connectors, Heat Shrink Terminals And Other Crimp Wire Connectors.

NON-INSULATED TERMINALS (BRAZED SEAM)

TERMINAL MATERIAL: COPPER
PLATING : TIN

VINYL-INSULATED TERMINALS

INSULATION MATERIAL: VINYL (PVC)
TERMINAL MATERIAL: COPPER
PLATING: TIN

VINYL-INSULATED TERMINALS (EASY ENTRY)

INSULATION MATERIAL: VINYL (PVC)
TERMINAL MATERIAL: COPPER
PLATING: TIN

VINYL-INSULATED TERMINALS (DOUBLE CRIMP) PVC

INSULATION MATERIAL: VINYL (PVC)
TERMINAL MATERIAL: COPPER
METALLIC SLEEVE: COPPER
PLATING: TIN

INSULATED HEAT SHRINKABLE TERMINALS BRAZED SEAM

INSULATION MATERIAL: HIGH DENSITY PE
TERMINAL MATERIAL: COPPER
PLATING: TIN

VINYL-INSULATED SPADE TERMINALS

INSULATION MATERIAL: VINYL (PVC)
MATERIAL: COPPER
PLATING: TIN

NYLON-INSULATED TERMINALS (EASY-ENTRY)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: COPPER
PLATING: TIN

NYLON-INSULATED TERMINALS (DOUBLE CRIMP)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: COPPER
METALLIC SLEEVE: COPPER
PLATING: TIN

Applications

* Connection of cables on terminal blocks (ring, fork and pin type)

* Leads, junctions and cable insulation (quick connectors)

* Connection and insulation of electric cables (caps and terminals)

* Connection of cables (joints and couplings)

NYLON-INSULATED RING TERMINALS (EASY-ENTRY)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: COPPER
PLATING: TIN

NYLON-INSULATED SPADE TERMINALS (EASY-ENTRY)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: COPPER
PLATING: TIN

NYLON-INSULATED PIN TERMINALS (EASY-ENTRY)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: COPPER
PLATING: TIN

NON-INSULATED PIN TERMINALS (BRAZED SEAM)

TERMINAL MATERIAL: COPPER
PLATING: TIN

VINYL-INSULATED BLADE TERMINALS PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: COPPER
PLATING: TIN

VINYL-INSULATED BUTT SPLICE CONNECTORS (COPPER TUBULAR) PV

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: COPPER TUBULAR
PLATING: TIN

VINYL-FULLY INSULATED RECEPTACLE DISCONNECTORS PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
PLATING: TIN

VINYL-FULLY INSULATED RECEPTACLE DISCONNECTORS (DOUBLE CRIMP) PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
METALLIC SLEEVE: COPPER
PLATING: TIN

VINYL-INSULATED BUTT SPLICE CONNECTORS (BRASS PLATE) PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
PLATING: TIN

NYLON-INSULATED MALE DISCONNECTORS (DOUBLE CRIMP)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: BRASS
METALLIC SLEEVE: COPPER
PLATING: TIN

VINYL-INSULATED FEMALE DISCONNECTORS (DOUBLE CRIMP) PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
METALLIC SLEEVE: COPPER
PLATING: TIN

VINYL-INSULATED PIGGY BACK DISCONNECTORS(DOUBLE CRIMP) PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
METALLIC SLEEVE: COPPER
PLATING: TIN

VINYL-FULLY INSULATED FEMALE DISCONNECTORS PVC

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
PLATING: TIN

NON-INSULATED PARALLEL CONNECTORS

INSULATION MATERIAL: VINYL(PVC)
TERMINAL MATERIAL: BRASS
PLATING: TIN

COPPER TUBULAR LUGS TERMINALS (TL TAPYE)

TERMINAL MATERIAL: COPPER
PLATING: TIN

NYLON INSULATED FLAG FEMALE DISCONNECTORS (EASY-ENTRY)

INSULATION MATERIAL: NYLON
TERMINAL MATERIAL: BRASS
PLATING: TIN

OPEN BARREL TERMINALS TERMINAL MATERIAL: BRASS

VINYL-INSULATED SLEEVES PVC MATERIAL: VINYL(PVC)

INSULATED CORD END SLEEVES (DIN 46228 / 4)

INSULATION MATERIAL: NYLON

TERMINAL MATERIAL: COPPER PLATING: TIN

Screw-On Wire Connectors

- * Tough thermoplastic, UL 94V-2 flame-retardant shell rated at 105°C (221°F).
- * Zinc-plated square wire spring ensures a firm grip on conductors.
- * Specific dented design offers better grip and comfort to ensure better torquing.
- * Color-coded to industry standards for quick size identification.
- * Rated to 600V max. for building wiring and 1000V max. in lighting fixtures/luminaires and signs.
- * UL 486C Listed and CSA C22.2 No. 188 Certified.
- * Available in socket tools for easy installation of the connectors (See page 13).

Winged Wire Connectors

- * Tough thermoplastic, UL 94V-2 flame-retardant shell rated at 105°C (221°F).
- * Zinc-plated square wire spring ensures a firm grip on conductors.
- * Swept-back wing design provides finger-tip comfort and increases torquing power.
- * Color-coded to industry standards for quick size identification.
- * Rated to 600V max. for building wiring and 1000V max. in lighting fixtures/luminaires and signs.
- * UL 486C Listed and CSA C22.2 No. 188 Certified.
- * Available in socket tools for easy installation of connectors (See page 13).

Closed-End Wire Connectors

- * Polyamide 66, UL 94V-2 flame-retardant shell rated at 105°C (221°F).
- * Two types of sleeves, aluminum or tin-plated copper, to choose between.
- * Long neck provides much more secure and easier installation.
- * Ideal for applications requiring vibration resistance.
- * UL 486C Listed and CSA C22.2 No. 188 Certified.
- * Crimping tools are available upon request.

UNIK Pro Push-In Wire Connectors

Push-In Wire Connectors, Compact

Push-In Wire Connectors Standard PC

Push-In Wire Connectors Standard PA

Push-In Wire Connector, 6 mm

EASY-LINK Lighting Connectors

TERMINAL BLOCKS (PA Housing, Brass Insert)

Specification

* Housing:

Polyamide 66 (PA 66), white
flame-retardant to UL 94V-2
Working temperature:
T110°C (IEC), 105°C/221°F (UL)

* Terminal Body:

Brass, nickel-plated

* Screw:

Steel, zinc-plated

* Strip Length:

PA8 - 5.0 mm/0.20 in.
PA10 - 6.5 mm/ 0.26 in.
PA12 - 7.0 mm/0.28 in.
PA14 - 9.0 mm/0.35 in.
PA16 - 10.0 mm/0.39 in.
PA18 - 13.0 mm/0.51 in.

TERMINAL BLOCKS (PA Housing, Brass Insert)

Specification

* Housing:

Polyamide 66 (PA 66), white
flame-retardant to UL 94V-2
Working temperature:
T110°C (IEC), 105°C/ 185°F (UL)

* Terminal Body:

Brass, nickel-plated

* Wire Protector:

Stainless spring steel

* Screw:

Steel, zinc-plated

* Strip Length:

PA8 - 5.0 mm/0.20 in.
PA10 - 6.5 mm / 0.26 in.
PA12 - 7.0 mm/0.28 in.
PA14 - 9.0 mm/ 0.35 in.

TERMINAL BLOCKS (PP Housing, Steel Insert)

Specification

* Housing:

Polypropylene (PP), white
flame-retardant to UL 94V-2
Working temperature:
T85°C (IEC), 65°C/149°F (UL)

* Terminal Body:

Steel provided with or without
a brass strip, zinc-plated

* Screw:

Steel, zinc-plated

* Strip Length:

PA20P & PA21P - 5.0 mm / 0.20 in.
PA30P & PA31P - 6.5 mm/ 0.26 in.
PA40P & PA41P - 9.0 mm/0.35 in.
PA50P - 9.0 mm/0.35 in.

SCREW CLAMP TYPE

Standard Feed Through Terminal Blocks

Current : up to 269 A
Wire Size : 0.2 - 120 mm²
Mounting : DIN 32 / 35 / 35-15

Multiple Connection Terminal Blocks

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 32 / 35 / 35-15

Double Level Terminal Blocks

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 32 / 35 / 35-15

Triple Level Terminal Blocks

Current : up to 24 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 32 / 35 / 35-15

Ground / Earth Terminal Blocks

Current : up to 125 A
Wire Size : 0.2 - 35 mm²
Mounting : DIN 32 / 35 /
DIN 35-15 / DIN 15

Neutral / Earth Clamps

Current : up to 140 A
Wire Size : 0.2 - 35 mm²
Mounting : Panel / Base /
DIN 35 / 35-15

Distribution Blocks

Current : up to 101 A
Wire Size : 0.2 - 25 mm²
Mounting : DIN 32 / 35 / 35-15

Double Level Fuse Terminal Blocks

Current : up to 6.3 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 32 / 35 / 35-15

Single Level Fuse Terminal Blocks

Current : up to 16 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 32 / 35 / 35-15

Disconnect & Test Terminal Blocks

Current : up to 41 A
Wire Size : 0.2 - 6 mm²
Mounting : DIN 32 / 35 / 35-15

Micro Terminal Blocks

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 15

Panel Mount Terminal Block

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : Panel / Base

Thermocouple Terminal Blocks

Current : up to 24 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 32 / 35 / 35-15

Tab Connection Terminal Blocks

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 32 / 35 / 35-15

WITH ELECTRONIC COMPONENTS TERMINAL BLOCKS

Terminal Blocks with Light Indication

SURGE SUPPRESSION TERMINAL BLOCKS

thereby protecting distribution and input

DISCONNECT & TEST

For measuring, control and regulatory circuits. They provide a clear functional advantage for devices having utility instruments and associated transformers.

CDS6U

Test Disconnect Terminal Block for 3 Phase 4 wire multi function meter

| No. | Cat. No. | Qty. |
|-----|----------|------|
| 1 | CDS6U | 10 |
| 2 | SLS2 | 3 |
| 3 | LCCDS | 4 |
| 4 | CA723/5 | 1 |
| 5 | EPCDS6U | 1 |

Operating status

SLS2 in open condition

STUD TYPE

Feed Through Terminal Blocks

Current : up to 41 A
Wire Size : 0.5 - 6 mm²
Mounting : DIN 32 / 35 / 35-15

Feed Through Terminal Blocks

Current : up to 125 A
Wire Size : 1.5 - 35 mm²
Mounting : DIN 32 / 35 / 35-15

Disconnect & Test Type Terminal Blocks

Current : up to 41 A
Wire Size : 0.5 - 6 mm²
Mounting : DIN 32 / 35 / 35-15

Power Terminal Blocks

Current : up to 232 A
Wire Size : 1.5 - 95 mm²
Mounting : DIN 35 / 35-15 / Panel

SPRING CLAMP

Feed Through Terminal Blocks

Current : up to 76 A
Wire Size : 0.2 - 16 mm²
Mounting : DIN 35 / 35-15

Multiple Connection Terminal Blocks

Current : up to 41 A
Wire Size : 0.2 - 6 mm²
Mounting : DIN 35 / 35-15

Ground / Earth Terminal Blocks

Current : up to 76 A
Wire Size : 0.2 - 16 mm²
Mounting : DIN 35 / 35-15

Terminal Blocks with Electronic Components

Current : up to 32 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 35 / 35-15

Angular Feed Through Terminal Blocks

Current : up to 41 A
Wire Size : 0.2 - 6 mm²
Mounting : DIN 35 / 35-15

Pluggable Terminal Blocks

Current : up to 24 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 35 / 35-15

Double Level Terminal Blocks

Current : up to 24 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 35 / 35-15

Triple Level Terminal Blocks

Current : up to 24 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 35 / 35-15

Fuse Terminal Blocks

Current : up to 6.3 A
Wire Size : 0.2 - 4 mm²
Mounting : DIN 35 / 35-15

Disconnect & Test Terminal Blocks

Current : up to 16 A
Wire Size : 0.2 - 2.5 mm²
Mounting : DIN 35 / 35-15

ACCESSORIES

Mounting Accessories

DIN Rails / Channels
Mounting Base
Mounting Handle
Mounting Bracket

End Clamps

For DIN 15, DIN 32,
DIN 35, DIN 35-15
Spacers

Marker & Marker Plotter

Group / Individual Marking
Marker Plotters
Engraving System

Shorting Accessories

Shorting Links, End, Partition
& Separator Plates, Protective
Cover, Side Holding Plates

SWITCHES & SOCKETS

DIN Rail Mounted Sockets & Switches

Current : up to 16 A
Wire Size : 0.5 - 2.5 sq.mm.
Mounting : DIN 35 / 35-15

Assembly for Control Circuit in
Injection Moulding machines

SCREW CLAMP TERMINAL BLOCKS HAVE BEEN USED IN VARIOUS INDUSTRIAL APPLICATIONS

A high torque clamping system on the Screw Clamp Terminal Blocks ensures safe, gas tight connections. While cold forged, rolled threaded screws ensure highly reliable connections.

The end plate forms an integral part of all Terminal Blocks for 16 mm² wires and above, their by completely closing the Terminal Blocks. This ensures safe isolation for power connections.

Same profile grounding terminals are clearly identified with a green-yellow housing. Their shape and thickness is identical to the Feed Through Terminal Blocks.

In high current Terminal Blocks, an additional auxiliary terminal can be connected. This enables an additional connection of upto 6 mm² wires.

Two level plus ground and Three level plus ground terminals facilitate single & three phase connections. These Terminal Blocks are an ideal choice for space saving applications.

Universal voltage rating of 6 - 60V & 110 - 240V is available on Fuse Terminal Blocks with offline indication. Both AC & DC circuits can be connected without any polarisation requirement.

CDS6U Terminal Block system is a versatile wire connection method for current transformer and power meters. A wide range of accessories eases the testing of connected instruments.

The CHV series High Voltage Terminal Blocks are suitable for upto 1000V DC applications required in the solar industry. The specially designed creepage and clearance distances help achieve the high voltage specifications.

Ideal for applications with limited space, these miniature blocks can be mounted on a special DIN15 rail.

Standardized marking solutions are available to create clear and user friendly Terminal Block assemblies. Users can order blank or custom configured marking tags.

CTL series Terminal Blocks can be used for connecting sensors and actuators in control systems. Standard screw type jumpers are used to create configurations for ease of voltage distribution.

Panel mounted Terminal Blocks eliminate the need for using DIN rails. Individual terminals can be 'clicked' into each other to create specific pole configurations as per user requirements.

BUSBAR

The busbars enable an up to date way of connecting all kind of installation devices. Compared to the conventional installation using wiring bridges it offers the following advantages:

- faster installation
- saving time
- compact design
- reliable assignment of the phases

Besides the pole number, the cross-section and the connection technology - pin or fork type the construction type is used as different criterion.

Usually the standard busbar is supplied in 1m lengths.

The customer will cut these bars according to his requirements.

Advantages:

- possibility of individual solutions regarding lengths
- limited stock

The design is marked by an extended gap between the different phases. This secures the creepage and clearance distances after cutting.

Another popular variation of the standard busbars is the MFC design.

This offers nearly unlimited possibilities regarding lengths ready to install.

Apart from the standard design also the Miniline system is an established design for several years.

With its very compact design Miniline offers ready fixed lengths suitable for many standard applications.

Without any problem Miniline can be installed overlapped. This allows you to extend the connection and to partially increase the cross-section.

Single pole

BUSBAR S-1L-1000/10iso"

- Universal for circuit breakers
- Dimensions of bar (W x L): 4 x 10.5 mm
- Length [mm]: 1000
- Cross-section [mm²]: 10

2 pole

BUSBAR S-2L-1000/10

- Universal for circuit breakers
- Dimensions of bar 1000 x 10 x 28 mm
- Length [mm]: 1000
- Cross-section [mm²]: 10

3 pole

BUSBAR S-3L-1000/10

- Universal for circuit breakers
- Dimensions of bar 1020 x 15 x 26 mm
- Length [mm]: 1000
- Cross-section [mm²]: 10 mm²

4 pole

BUSBAR S-4L-1000/16

- Universal for circuit breakers
- Dimensions of bar 1000 x 21 x 30 mm
- Length [mm]: 1000
- Cross-section [mm²]: 16 mm²

BUSBAR'S TECHNICAL INFORMATION

section rails fork type

Fork-type busbars offer the same advantages as the pin-type version (see chap. 1). They are available in the same variations.

This type is often used for the combination of RCDs and MCBs. The double-option terminal gives the possibility to connect the busbar as well as the cable directly to the box terminal.

Wiring with breaker

The more stable shape of the fork guarantees a secure connection even while tightening with bigger torques.

If you feed-in from the middle you have to observe that the sum of the outgoing is not higher than the max. current of the busbars I_n /phase!

Please note:

Busbars UL approved on request!

On request we are able to offer you different dimensions than the standard ones eg. step of 17,6 or 18 mm or even other steps as well as variations of the forks (M5, length of fork) and the pins (length and width).

Several busbars are available with a pin or fork to be broken out.

Surplus costs for printing of phase-description and/or logo on request.

Subject to alterations!

insulator for vertical/horizontal

FLEXIBLE CONDUIT

Conduit type GAAR

Application:

Very suited where is necessary an high flexibility together with a good mechanical resistance to traction, torsion and compression and where no liquid tight is requested

Conduit type GARIX

Application:

Very suited where is necessary an high flexibility together with a good mechanical resistance to traction, torsion, compression, corrosion and where no liquid tight is requested

Conduit type DMC

Application:

Very suited where is necessary a strong mechanical resistance to traction, torsion and compression

Conduit type DMCX

Application:

Very suited where is necessary a strong mechanical resistance and an excellent resistance to traction, torsion, compression and corrosion

Conduit type DMC-ABT

Application:

Very suited where is necessary a strong mechanical resistance and an excellent resistance to traction, torsion, compression and particularly advised for high and low temperatures and in presence of high temperature's change

Conduit type DMC-ABTX

Application :

Very suited where is necessary a strong mechanical resistance and an excellent resistance to traction, torsion, compression and particularly advised for high and low temperatures and in presence of high temperature's change

Conduit type DMC-PU

Application:

Very reliable where is necessary a strong mechanical resistance and an excellent resistance to traction, torsion and compression. Particularly advised in case of eventual combustions that do not release halogen substances or toxic smokes

Conduit type UALT 2000

Application:

Very suited where is necessary to protect equipments against electromagnetic interferences according to european norms about electromagnetic compatibility EMC 89/336 EEC.

Application:

Very suited where is necessary a strong mechanical resistance to traction, torsion and compression

Application:

Particularly advised in case of eventual combustions that do not release halogen substances or toxic smokes. good mechanical resistance and an excellent resistance to traction, torsion and compression.

Application:

Very suited for installations where is foreseen the presence of twinkling and incandescent slags (rolling mill, foundry, welders printing works). It has a good mechanical resistance to traction, torsion and compression

Application:

Very suited for installations where is foreseen the presence of twinkling and incandescent slags (rolling mill, foundry welders, printing works). It has a good mechanical resistance to traction, torsion and compression

Application:

Very suited for installations where is foreseen the presence of twinkling and incandescent slags (rolling mill, foundry, welders and printing works). Particularly advised in case of eventual combustions that do not release halogen substances or toxic smokes. It has a good mechanical resistance to traction, torsion and compression

Application:

Very suited for installations with temperature higher than 300°C where is foreseen the presence of twinkling and incandescent slags (rolling mill, foundry, welders, printing works). It has a good mechanical resistance to traction torsion and compression

• Flexible fittings are available.

Conduit type DMT-EMP

Application:

Developed to assure a complete protection from interferences due to an electromagnetic field (EMC). It can be used in The army or wherever is necessary to protect sophisticated equipments from EMC interferences, according to european norms about EMC compatibility EMC 89/336 EEC. Very suited where in necessary a strong mechanical resistance and an excellent resistance to traction, torsion and compression.

Conduit type DMC HJT-L

Application:

Conduit type DMC HJT-L is developed to offer together with high mechanical protection to traction, compression and crash, also thermic protection in particular aggressive environment in presence of flames, splashes of metal or of melted glass, steam water. The external recovering is made up by a mineral fi berglass, with a silicon elastomer, that can resist to exercise temperatures range -60°C + 260°C (800°C highest point for 20 minutes)

Conduit type DMA

Application:

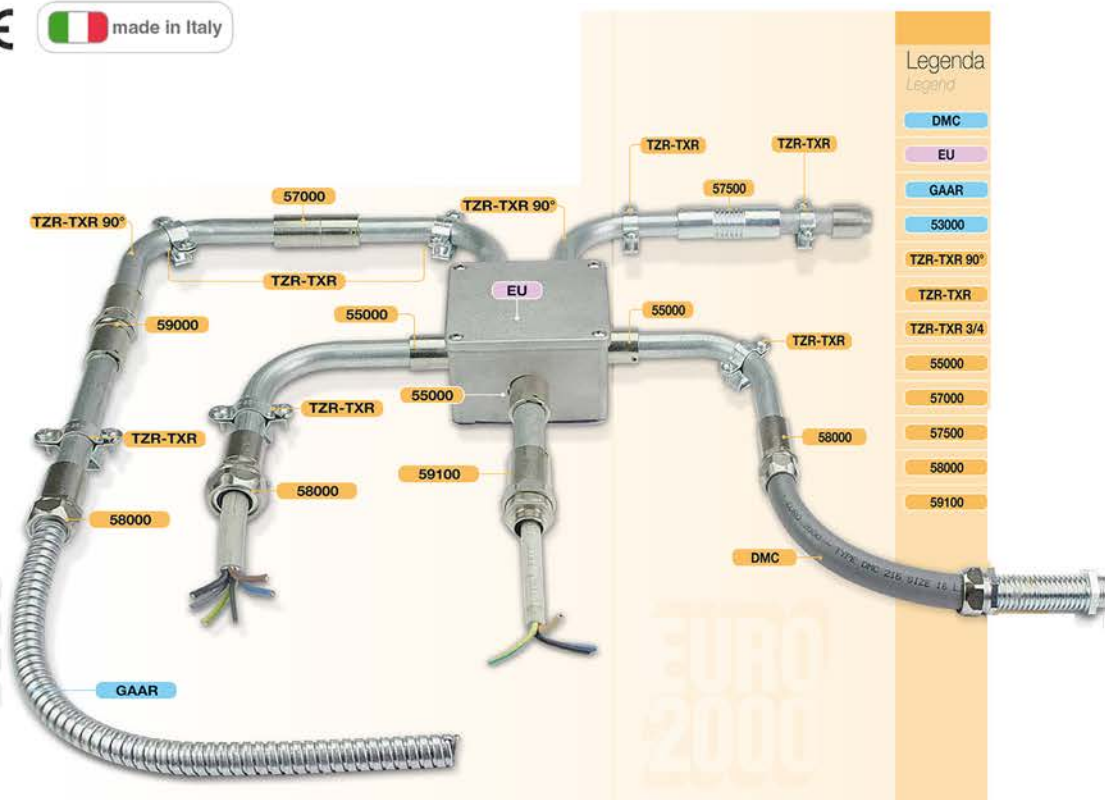

Very suited where is necessary a good mechanical resistance and an excellent resistance to traction, torsion and compression

Rigid threaded pipes

Rigid pipes are used for the passage of cables in anti-explosive electrical systems, which are (AD-PE) explosion-proof. Our rigid threaded pipes are provided with UNI 6125 conical gas thread with UNI 7684 sleeve or American NPT thread with galvanized sleeve screwed on one end and the other end protected by a plastic material cap. Our pipes are hot-galvanized according to EN 10240. UNI 7683-7684, a European standard also specifies the requirements for galvanized round pipes when welded using unalloyed carbon steel with conical gas threads.

RoHS CE Made in Italy

Classification in compliance with CEI EN 61386 standards

Product features TKS KLIKSEAL®

Height of only 17-20 mm, 5,5 mm on the outside.
Cable glands are approx. 30-40 mm.

Handles large range of cable
and pipe diameters.

Installation time
saving of up to 90%.

Self-adjusting to
wall thickness.

Ergonomic
installation.

"Pushout"
membrane

Fixed in both direc-
tions when mounted.

Space sa-
ving design

Integrated tension relief

IP67

**KLIK = No material
compression during
installation.**

**Rubber coated tension relief
for protection of the cable
mantle.**

Material TPE and Polyamide 66 - Halogen Free
UL listed material
Mode of protection IP67 / IP65
Temperature range -20°C...+125°C ⁽¹⁾
Test standard EN60529:1991 + A1
EN50262:1998 + A1+A2
Semko report 1111146 + 606620

- Integrated cable anchorage
- Fixed in both directions when mounted
- Space saving design
- Very quick and simple installation without the use of tools

Center the KLIKSEAL in the open-
ing (from the inside), push evenly
with both thumbs until it "klicks" into
place.

Insert the cable from the side with
the polyamide tabs.

Product features RUTASEAL® & RUTASEAL LIGHT®

IP Class: IP67 (external).

Both Metric and
PG programmes.

"Pushout" membrane
with 0,25 mm thickness.

Internal / External
holes IP67.

Produced in halogene-free
EPDM or Chloroprene.

Internal / External
holes IP67.

RUTASEAL can be assembled
from either end depending
upon the application.

Hardness:
60 ± 5 (Shore density).

Suits material thick-
ness 0,5 - 4 mm both in
plastic and metal.

Material

EPDM - Halogen Free
Resistant to chemicals and
weatherproof.

Mode of protection

IP67

Temperature range

-40°C...+110°C (1)

Semko report

1301727 (M12-M50), 1612391 (M63)
1122298 (M12F, M16F)

- Quick and simple assembly without the use of tools
- Can be assembled from either end depending on application
- "Pushout" membrane

Push the grommet into the hole.

Pierce the grommet with the cable.

The grommet is then locked in
position by pulling back on the

RUTASEAL® Rubber Grommets

RUTASEAL® is very simple to use and demands no tools, which in turn means lower work cost. It requires no screw-driver or scissors to make the hole, which otherwise would endanger the IP-class seal. RUTASEAL® is SEMKO tested for IP67 internally and externally. The chloroprene version is also DNV approved. RUTASEAL® is produced in EPDM and Chloroprene in both PG and Metric. The seals are produced in black, light grey and grey. RUTASEAL® has a very high finish and the automatic method of production guarantees the same even and high quality on all products at all times.

DESIGN-A-FLANGE

With Design-A-Flange we are introducing a brand new flange concept, with an unparalleled level of protection and flexibility. Design-A-Flange is an innovative modular system where inserts can be changed depending on your needs. You can design your own configuration based on how many openings you want, where you want them placed, and what type of seal you want to have.

You are no longer forced to use a fixed flange with a certain number of pre-determined openings.

You choose the configuration that suits your needs.

The push-out membranes ensures fast and easy installation without worries about achieving the correct IP-level. Should you want cable anchorage on certain cables then just install a Klikseal or a cable gland in the flange. If a cable no longer will be used you can seal the opening either by replacing the insert or cutting out the membrane and sealing the opening with one of our grommets.

Cable penetration by design

Design-A-Flange offers a number of features that you cannot find in any other flange solutions

- * Design your own configuration, with the right size openings, and right number of openings placed where you want them
- * Push-out membranes to make installation fast, easy and fool-proof High IP-protection
- * No need of drill separate holes to install a Klikseal or a cable gland. The ease of change of one longer when used

Product advantages Design-A-Flange

Installation of cables
Push the cable through the membrane until the membrane pops out, or push out the membrane before installing the cable with a smaller cable or screwdriver.

Brass Cable Glands

A1/A2 Industrial Cable Gland

Brass indoor and outdoor cable gland highly suitable for all types of unarmoured cables, plastic or rubber sheathed cables. This gland provides a seal on outer sheath.

Recommended to use PVC shroud for additional ingress protection.

CW Industrial Cable Gland

Brass indoor and outdoor gland most popularly used with single wire armoured, plastic or rubber sheathed cable. Terminates and secured cable armouring and outer seal grips sheath of cable thus ensuring mechanical strength and earth continuity.

Earth tags to be use for earth continuity.

CW brass glands are also supplied with integral earth facilities.

Recommended to use PVC shroud for additional ingress protection.

PR 33 Universal hand press

Universal hand press for terminals:

- with and without insulation of $0,5 \div 6 \text{ mm}^2$

Features:

- easily exchangeable dies (see chart below)
- two-component grips prevents hand slipping using minimum force

- an eccentric for adjusting clamping force
 - available with sets of dies in functional case
- Length: 220mm; Weight (without dies): 500g

- cable end-sleeves of $0,5 \div 35 \text{ mm}^2$
- high repetitiveness and precision of crimping
- ratcheting mechanism enables easy crimping
- selection of dies for individual needs

GZ 300 Hydraulic head

Hole punching tools

EGC 45 Battery powered shears

HRZ 300 Hydraulic hand press

HR 100-U Hydraulic hand press

EPZ 120 Battery powered hydraulic press

Battery powered hydraulic press for:

- Cu tubular terminals and connectors on cable conductors (ZSM dies) of $6 \div 120 \text{ mm}^2$
- Al tubular terminals and connectors acc. to DIN standard, on cable conductors (ZSM dies) of $16 \div 70 \text{ mm}^2$
- Al tubular terminals and connectors outside DIN standard, on cable conductors (ZSM dies) of $16 \div 120 \text{ mm}^2$

Special features:

- automatic off switch ending operation cycle after a proper crimping is complete
 - indicated by green LED, not accurate crimping cycle – indicated by red LED
 - electronic record of operation cycle – data transfer via USB
 - efficient lithium-ion battery
 - automatic pressure control
 - flip top, rotatable by 330° head
 - 2 batteries provided with set
- Weight: 2,9 kg; Force: 32kN

GC 50-H800-E, GC 100-H800-E
Safety cable cutting set

RC 5 Cable shears

⚡ 1000 V

Shears for cutting:

- Al and Cu single- and multistrand cables, outer diameter up to 5 mm
- steel cable, diameter 2 mm

Features:

- shaped blades for easy cutting
- lever optimizes the force required to cut

NOTE: ability to work under voltage up to 1000V
Length: 200 mm; Weight: 290 g

RC 13 Cable shears

RC 15 S Cable shears

Control & Signalling Devices

Push Buttons & Pilot Lamps

- Widest range 22.5mm; illuminated and non-illuminated actuators in polycarbonate & metallic
- Pilot lamps - LED / Filament / Neon
- Ingress protection IP65 / IP66; NEMA4/4X

Push Button Stations

- Available in 1, 2, 3 & 4 ways; IP65 box with different combination of push buttons / selectors : Ingress protection IP65 / IP66; NEMA4 / 4X
- Stations in aluminium die cast / plastic boxes

Non-Illuminated Push Buttons (Type RB2-B)

(Control Units with chromium plated metal bezel)

Robusta Contactors & Overload Relay

RANGE

- robuTa Contactors
- Rating: 9A~2100A
- Poles: 3 & 4 Pole, control relays
- Overload Relays
- Rating: 0.1A~ 1000A

FEATURES

- Superior functional aesthetics and advanced performance
- Common add-on accessories – front / side auxiliary contact block
- pneumatic timer block, mechanical interlock & coil suppressor
- Overload relays auto / manual reset with built-in single phase protection
- High mechanical life achieved by optimum design and world class material

Capacitor Duty Contactors

RANGE

- Rating: 7kVAR ~ 75kVAR
- Poles: 3 Pole, 415V AC, 50/60 Hz

FEATURES

- Excellent damping of In-rush current
- Reduced watt loss during "ON" condition, saves energy
- Capacitor bank switching in parallel without de-rating
- Enhanced equipment life
- Low maintenance down time
- Power quality improvement
- Optimized solution cost

Switch Disconnectors

RANGE

- Rating: 25A ~ 3150A, 415V, AC23A
- Poles: 2P, 3P, 4P & 6P

FEATURES

- Modular pole design – economical maintenance
- Available in open / sheet steel enclosure version
- Quick make & break mechanism, self cleaning contacts
- Compact construction
- Door interlock and padlock facility
- Suitable for isolation
- Telescopic shaft for depth adjustment
- Door defeat
- Provision for 2NO+2NC aux contacts

Changeover Switch (with & without fuse)

RANGE

- Rating: 63A ~ 3150A (without fuse); 125 ~ 800A (with fuse), 415V, AC23A
- Poles: 3P, 4P & 6P

FEATURES

- Available in open / sheet steel enclosure version
- Suitable for isolation
- Telescopic shaft for depth adjustment
- Door defeat
- Provision for 2NO+2NC aux contacts

RISH Whiteline Panel Meters for Power, Power Factor and Frequency

2 IN 1 Meter

2 in 1 Series Panel Meters simultaneously measures 2 electrical parameters in single 96 x 96 mm meter. The 2 in 1 Series Consists of DE (Moving Iron), DS (Moving Coil), DG (Rectifier) & FM (Frequency) meters. Mainly recommended in Synchro Panel.

Types: Voltage - Voltage, Ampere-Ampere, Voltage-Ampere, Hz-Hz
Applicable Standards: IEC 60051

Synchroscope (SQ)

Transducers

Rish Con Series Transducers

RISH CON CA/CV

RISH CON M

Electrical Transducers

RISH *Ducer*/CON Series

Features

- ◆ Transducers are the beginning of a measuring Chain. Transducer acquires any electrical or Physical quantity and converts it into a proportional electrical signal. The output signal is either a DC voltage or a DC Current and is load independent through a wide range.

Applications

- ◆ Telemetry (e.g. Remote transmission of electrical parameters to regional distribution center)
- ◆ PLC, SCADA (Supervisory Control & Data Acquisition)
- ◆ Energy Management.
- ◆ Process Control where accurate & reliable monitoring of Electrical parameters is desired.
- ◆ Input to Recorders / Indicators
- ◆ Monitoring of various electrical parameters at generation, transmission & distribution of electrical energy.

Carriers PLIOGRAPH PLUS in Flexible PVC

Transparent carriers Material: PVC Colour: transparent
In 6 sizes: for wires and cables of Ø 1,1 to 30 mm.
4 lengths: 3, 6, 8 and 10 standard markers
type 150, or 4, 8, 11 and 14 narrow markers type 200
In strips of 0,60 m for cutting to required length.
- Available as Double carriers in flexible PVC

- 10 mm (supplied in bags)
- 18 mm (supplied in bags)
- 32 mm (supplied in bags)
- 0,60 m for markings
requiring lengths greater than shown above
(supplied in boxes)

PR PLIOGRAPH PLUS

Carriers in Ethylene Vinyl Acete (Halogen Free)

"PR" transparent carriers
Three sizes: for Ø 1 to 9 mm
Material: EVA halogen free (- 10 to + 65°C)
Colour: clear
With marker holder:
In wires and cables of Ø 1 to 9.
In 3 sizes: 1 of them in 2 lengths.
For 6 to 7 standard markers for type 150
or 8 to 9 narrow markers for type 200

PLIO CARRIERS

- Material: PVC, PP
flame resistant flame resistant
Operating temperatures: -20 to +90°C -20 to +90°C
Specifications: V0 UL94 V0 UL94
halogen free (HF)
Applications: our carriers are designed to respond to the need for speed of application, retro-marking, larger diameter cables and other applications.
 - Marking upon request.
 - Permanent marking.
 - Length of the carrier depends on text and its height.
 - Available in colors.

- Material: flexible PVC (quality 9920)
Operating temperatures: -20 to +90°C
Specifications: V0 UL94

Label LF

Material: PET
Temperature range: -40 to +125°C
Label thickness: 0,195 mm
Standard colours: white - yellow
Specification:
- printable on a LASER printer,
- double sided printing: 1 side colour white
1 side colour yellow.

Band PTE

Material: EVA Colour: transparent
Operating temperatures: -20 to +65°C
Application: punched transparent support band for large cables and tubes. The band punching can be held with our SES-QUICK cable ties width 2,6 mm.
The M1P-BAND10 band, printable with our PLIOSCRIB M1-PRO printer, the labels LFL 9,5, printable with a laser-printer, as well as the PLIOMARK MINI labels (only PT EF band) can be used with PT band for a clean and sustainable identifying

EC Type Marker Tube

Material: soft PVC prevents oil and other substances from corroding.
Structure: The inside of the EC type tube is concave and flexible, and the inner diameter could be stretch out and draw back with the size of the wire.
Features: Short length, suitable for the joint of special signs, black on yellow background, black on white background, could clearly set off the wire number

Color Coded Cable Marke

Material: South Asia soft PVC prevents oil and other substances from corroding.
Structure: The inside of the EC type tube is concave and flexible, and the inner diameter could be stretch out and draw back with the size of the wire.
Features: 1. Short length, suitable for the joint of special signs, black on yellow background, black on white background, could clearly set off the wire number.
 2. One type of EC wiring mark could be used for a variety of wires.

N Type Coded Cable Marker

Material: Paraformaldehyde (POM)
Application: Put the bellmouthing close to the wire, and then push the mark with your fingers, and the mark could slide onto the wire and be firmly clamped.

M Type Color Coded Cable Marker

Material: Made of UL qualified POM, fire rating 94V-2.
Features: The mark adopts double-convex and double-concave design, it is not easy to individually flip when the mark is combined, and the code is maintained
Color: International standard color code.

EC-J Flat Cable Marker

Material: South Asia soft PVC prevents oil and other substances from corroding.
Usage: A. Use as a normal tube: suitable for round or flat wires with diameter of 3.5mm~7.0mm.
 B. Used in conjunction with marking targets to mark large cables.

Marker Strip

Material: UL-qualified PVC/NYLON 66 (black), fire rating 94V-2
Application: With white and flat wiring signs used to mark large cables.
Usage: First fit the mark on the target, and then fix both ends of the target with nylon cable ties

Shrinkable Polyolefin Identification Sleeves

Operating temperature

- Operating temperature: -55°C ~ 135°C
- Minimum shrink temperature: 80°C
- Minimum fully recovery temperature: 120°C

Color

- SAE AMS-DTL-23053/5
- UL224 125°C 600V
- SAE AS 81531, MIL-STD-202
- Standard color: White Yellow
- Other colors are available upon request.

PVC Marker Tubes

- ◆ Unique round profile for customized cable and wire marking.
- ◆ Reduces marking costs in projects for frequent, fast and late stage alterations.
- ◆ Fast to use bulk reel and box format.

Material: Made from premium **Heavy Metals free ROHS compliant**

| Item No. | Inner Diameter (in mm) | Wall Thickness (in mm) | Standard Packing | Suitable for wire size |

| MS10.0 | 10.00 | 0.50 | " | 25 sq.mm |
| MS12.0 | 12.00 | 0.60 | " | 35 sq.mm |

Widely used for printing markers on all types of ferrule printing machines of reputed makes.

Standard Colors: White & yellow

Other sizes of different inner diameters, wall thickness and colors are available on request

Performance of Marker Tube:

- Ultimate Elongation: 275%
- Temperature Range: -20 Deg C to +85 Deg C
- Tensile strength: 15.50 N/mm²
- Durability:-Flammability resistance according to UL94-V0

Heat shrinkable identification marker sleeves

◆ Features

Shrink ratio: 3 :1
Operating temperature range: -55°C~125°C
Minimum shrink temperature: 70°C
Minimum fully recovery temperature:110°C
Flexible, highly flame-retardant.
Conform to RoHS 2.0 (EU) 2015/863)
UL224 E214175 125°C VW-1
SAE-AS81531,MIL-STD-202

◆ Color

Standard color: white,yellow.

◆ Technical Data

| Property | Test method | Requirement |
|------------------------------|--------------------------------------|----------------------------------|
| Tensile strength | ASTM D 638 | ≥10.4MPa |
| Ultimate elongation | ASTM D 638 | ≥200% |
| Print performance | SAE-AS81531 | 50rubs.legible |
| | MIL-STD-202 | 30 strokes,legible |
| Dielectric voltage withstand | UL224 | 2500V, 60sec no breakdown |
| Dielectric strength | ASTM D2671 | ≥19.7kV/mm |
| Volume resistivity | ASTM D 876 | ≥10 ¹² Ω·cm |
| Heat shock <200°C,4hrs> | ASTM D2671 | No cracking, dripping or flowing |
| Flammability | Average burn time is less than 1 min | Pass |

High temperature heat shrinkable identification marker sleeves

◆ Features

Shrink ratio: 2:1
Operating temperature range: -55°C~200°C
Minimum shrink temperature: 155°C
Minimum fully recovery temperature:175°C
Flexible, highly flame-retardant.
Provide insulation and strain relief.
AMS-DTL-23053/18
SAE-AS81531,MIL-STD-202

◆ Color

Standard color: white,yellow.

◆ Technical Data

| Property | Test method | Requirement |
|---|--------------------------------------|----------------------------------|
| Tensile strength | ASTM D 638 | ≥24.3MPa |
| Ultimate elongation | ASTM D 638 | ≥200% |
| Print performance | 50rubs.legible | 50rubs.legible |
| | 30 strokes,legible | 30 strokes,legible |
| Dielectric voltage withstand | UL224 | 2500V, 60sec no breakdown |
| Dielectric strength | ASTM D2671 | ≥23.6 kV/mm |
| Volume resistivity | ASTM D 876 | ≥10 ¹² Ω·cm |
| Heat shock <275°C,4hrs> | ASTM D2671 | No cracking, dripping or flowing |
| Low temperature flexibility<-55°C,4hrs> | ASTM D2671 | No cracking |
| Flammability | Average burn time is less than 1 min | Pass |

M211 Accessories

| Article No. | Description |
|-------------|----------------------------|
| 170385 | M211 Belt Clip |
| 170386 | M211 Hard Case |
| 170387 | M211 Power Brick |
| 170388 | M211 AC Wall adapter EMEA |
| 170425 | M211 Magnet Only Accessory |

SELF-LAMINATING CABLE & WIRE LABELS

- Clear, wrap-around tail overlaminates white print-on area to protect text
- Great for data cables or wires that are frequently handled & moved

PERMASLEEVE™ HEAT-SHRINK CABLE & WIRE MARKERS

- 3:1 heat-shrink ratio, wire marker sleeve
- Fade resistant and flame retardant for superior aesthetic appearance
- Meets several SAE and MIL-STD specs*

CABLE & WIRE WRAP AROUND LABELS

- Nylon cloth label is highly pliable conforming to tightly curved surfaces
- Print multi-line legends in multiple areas when using flag mode
- Text entered in wire marker mode auto-repeats when label prints

NYLON STRIPS FOR TERMINAL BLOCK MARKING

- Narrow nylon cloth label strips for alignment on terminal blocks
- Prints terminal identification with user specified spacing using terminal block mode

POLYESTER STRIPS FOR COMPONENT MARKING

- High performance polyester material with white or transparent finish
- Best for flat, smooth surfaces
- B-488 withstands numerous solvents and variable temperatures

INDOOR/OUTDOOR VINYL FOR GENERAL INDUSTRIAL MARKING

- Adheres to irregular, rough and curved surfaces
- Stands up to grease, oil and most industrial chemicals
- 8-10 years* average outdoor durability in temps from -40°C to 82°C

Watch Introduction
Video of GRIPTUBE

1 GRIP TUBE Easy stop & Multi wire diameter tubing(sleeve)

Specially designed internal tube shape helps your markers hold a fixed position on the wire, even when using multiple wire diameter sizes. This material is a good fit for ferrule terminals.

1 Inside Shape

*Depending on Vibration it may move. We recommend checking performance test by yourself.
*The recommended size does not guarantee a match between wire and tube.

2 Features

2 ID PLATE

3 ROUND TUBE

2 'N'Tube
UL224/E171616/105°C/600V
This 'N' tube series has acquired the UL224 certification, high insulation performance.

4 TAPE

EASY STEPS OF TUBE(SLEEVE) MARKING

DEVELOPED FOR MAXIMIZING CABLE MARKING JOB PRODUCTIVITY

Long consumable roll length

LM-550A/PC adopts the dedicated consumables which have a longer roll length. Long roll length saves reloading time.

| | |
|----------------------------------|------------|
| LM-IR300B ink ribbon for LM-390A | 50 meters |
| LM-IR50B ink ribbon for LM-550A | 110 meters |
| LM-TP3xxx tape for LM-390A | 8 meters |
| LM-TP5xxW (White) for LM-550A | 16 meters |

*LM-TP5xxT (Transparent) and TP5xxY (Yellow) remain as 8meters.

High-speed marking

LM-550A/PC has an enhanced feeding system that provides you with marking speed at 40mm/second. LM-550A/PC can make approx 52pcs of 20mm-length tube per minute.

| For marking on Tube | Marking time |
|---------------------|--------------------------|
| LM-390A | 100 |
| MAX previous model | |
| LM-550A | 88 |
| | Saving time 12%!! |

Maximum 250,000 characters built-in large memory storage

Easy access from your PC with USB

LM-550A/PC features a USB port for a direct cable connection with a WindowsPC(for direct printing or file transfers), and a USB flash drive slot for transferring computer files made in our dedicated "LETATWIN PC EDITOR" software.

SPECIFICATIONS

| ITEMS | CONTENTS |
|---------------------------------------|--|
| Name | MAX ELECTRONIC LETTERING MACHINE LM-550A/PC |
| Dimensions | 295 (W) × 293 (D) × 94 (H) mm |
| Weight | 2.4kg |
| Printing method | Thermal transfer method (300dpi) |
| Display | LCD dot matrix : 64×160 Pixel (Backlit) |
| Printing speed | 40mm/s (Standard) 20mm/s (Low temperature mode) |
| Maximum Printing length | Tube : 20m, Tape : 5m By multiple copy printing, maximum 30copies, upto Tube : 100m, Tape : 7m |
| Maximum number of characters to input | 5,000 characters per file |
| Character size | 1.3, 2, 3, 4, 6mm height φ1.5mm ~ 8.0mm (PVC tube) (For φ1.5~2.0mm tubes, the dedicated attachment (standard accessory) is required.) φ2.0mm ~ 6.5mm (Heat Shrinkable tube) |
| Usable tube | |
| Usable tape | Width 5, 9, 12mm (Max genuine tape) |
| Tube cutting method | Auto half cut, manual full cut |
| Internal memory | 250,000 characters (Maximum 50 files) |
| External memory | USB memory |
| Interface | USB 2.0 full speed |
| Power supply | DC12V, 3.0A <small>Use only specified AC Adapter (100V~240V) included in the package</small> |
| Power consumption | Max 30W |
| Operating environment | 10°C to 35°C |

PC REQUIREMENTS For Windows 10 / 8.1 / 8 / 7 operating systems. Windows® is a registered trademark of Microsoft Corporation(US) in U.S.A. or other countries.

The specifications and design of the products in this catalogue will be subject to change without advance notice due to our continuous efforts to improve the quality of our products.

Versatile marking capability

Various marking media and sizes

- φ1.5~φ8.0mm PVC tubes
- φ2.0~φ6.5mm Heat Shrinkable tubes
- 5mm/9mm/12mm wide MAX dedicated tapes

● I.D. plates

● Oval tubes *For the availability of European style marking media, please contact our distributor.

To optimize printing quality, multiple combinations of settings (such as vertical/horizontal print positions and print density) can be saved to support European style marking media etc.

Large and backlit LCD display

Backlit LCD display makes your confirmation of input contents easy, even if you work in a dim jobsite.

The pitch can be set up to maximum 60mm.

Marking on tape : 4 up to 60mm

Marking on tube : 10 up to 60mm * (Auto pitch function is available for more than 60mm)*

Economical refill-type ink ribbon.

CUSTOM LABELS ON DEMAND & IN HOUSE

Eliminates minimums, waiting, purchasing costs and more.

UNIQUE INTEGRATED PLOTTER CUTTER

Allows you to make any shape or size of labels; no need to keep inventory of multiple size labels.

Cuts out letters and symbols for glass, walls and banners.

HIGH RESOLUTION PRINTING (400dpi)

Enables fine print on nameplates with clear legibility.

5-YEAR RATED TAPE ROLL AND INK RIBBON

Eliminate the needs to remake and reinstall old signs and labels.

THERMAL PRINTING TECHNOLOGY

Ensures high performance in tough environments, holds up to solvents, cleaners and wear

SAVE TIME, SAVE MONEY AND IMPROVE PROCESSES

Sourcing appropriate labels and signs can often be time consuming and costly, especially when only small quantities, specifically worded, or exact sized outputs are required. This is where the MAX Bepop allows you to realize huge cost savings and operational improvements, by producing exactly what you want, when you want it... 24 hours a day!

**NO NEED FOR PRE-PRINTED LABELS
NO MORE WASTED STOCK**

ALL IN ONE PRINTER!

Watch
the video

Print and cut the exactly what you need in-house, anytime!

● Case Study: Safety Guidance Signage

Sign is purchased:

Before

Contents:

- 1) "All visitors must wear personal protective equipment while on site"
- 2) Generic guidance mark

Kaizen

Sign is made on site:

After

Contents:

- 1) "NEED PROTECTIVE FOOTWEAR?"
- 2) "Go to the Safety Department 1st Floor-Admin Building."
- 3) Photo of destination is displayed with red arrow marking entrance.
- 4) Safety shoes guidance mark is used.

Conclusion : The CPM-200 allows you to tailor content to the exact needs of your site. In this case, leading to improvements in safety compliance for both employees and visitors.

● Built-in plotter can cut any shape you need!

Free Cut!

Print in full color on 200mm wide vinyl!

**A4 SIZE
SUPPORTED**

The CPM-200G can print in vivid full color using 4 specialized process color ink ribbons (Cyan, Magenta, Yellow, and Black). Unique functions mean you can cut and print combinations of photos, illustrations, and text on 200mm vinyl! Make on-demand signage and labels for a variety of applications.

● Use photos, illustrations, and text together!

*The largest printing range is 200mm x 2m (8" x 78.7"). Including the margins, the vinyl supports 206mm or approx. A4 width.

View the video!

Make labels, signs, and cut-lettering easily!

Anyone can design labels or signage easily using BepopPC EX editing software. After designing your labels or signs, send the data to your Bepop. The Bepop will print the colors, and then cut your shape.

1 Print → **2 Return** → **3 Cut the shape** → **4 Complete**

MACH1, MACH2

for desktop applications

4" desktop printers in proven technology

With the MACH1 and MACH2 cab completes its printer range in the lower price segment.

The devices ideally fit with small to medium duty applications in thermal transfer and direct thermal printing.

MACH1 is provided with control buttons and a LED signal, while MACH2 has a colored LCD display and a navigator pad.

Fields of application

| Business area | Applications |
|---------------------|---|
| Office/authorities | Information and warning labels, inventory labels |
| Production | Product labels, protocol, certification and test labels |
| Healthcare | Labels for patient admission, blood banks |
| Trading | Product labels, pricing |
| Warehouse | Labels for storage location, shelf labeling |
| Transport/logistics | Address and shipping labels, incoming goods |
| Events | Labels for events in sports and schools, tickets |

Label printers XD4T

It prints on both sides of textile tapes, cardboard labels, pressed tubes continuous or ready-for-use as well as on endless materials made of plastic, paper or cardboard. The ribbon separates from the materials with the help of a draw roller that also improves the accuracy of the imprint.

No print head adjustment necessary with different material widths. Print rollers provided for slim and thin materials.

MACH 4S for industrial applications

The MACH 4S provide all features of an industrial printer with a wide application range. The print mechanics and the chassis are made of high-quality materials and perfectly match in terms of shape and function.

SQUIX

SQUIX 2 ,SQUIX 4 , SQUIX 6, SQUIX 8

Left & Centered - aligned

The professional SQUIX label printers are the further development of the successful A+ printer series.

They find use in various areas of use.

They have been developed with consistent focus on intuitive usability and highly reliable processing.

Print mechanics and chassis are made of high-quality materials and match perfectly in design and function.

A wide range of peripherals and software enable user-specific solutions.

The rugged printers stand up to any demand, whether operated stand-alone, with a PC or in a network.

Print jobs are performed quickly and labels are provided straight away thanks to a high-speed processor.

Label printers
for industrial operation

SQUIX
Made in Germany

Key features

- Reliable and quick printing
- Accurate print images
- Easy to operate
- Compact design
- Maximum quality standards

Control panel

Self-explanatory symbols simplify settings and enable printers be operated intuitive and easily.

- LED:** Power ON
- Status bar:** receive data, record data stream, prior warning to a ribbon ending, SD memory card / USB stick plugged, Bluetooth, WLAN, Ethernet, USB slave, time
- Printer status:** ready, pause, number of labels printed in a print job, label peeled off, awaiting external start signal
- USB port** for plugging a service key or a memory stick, to transfer data to the IFFS memory
- Operation**
 - Cutter / perforation cutter: cutting
 - External rewinder: outside or inside winding
 - Tear-off mode / peel-off mode: printing a label
 - Applicator: printing and applying a label in individual steps
 - Jump to menu
 - Stop and delete all print jobs
 - Interrupt and continue print job
 - Reprint last label
 - Label feed

External control panel

If the control panel of a printer cannot be accessed, an additional external one can be plugged.

Same functionality as on a printer

Landscape mode or portrait mode

Operability as targeted, either on an external panel or on a printer

USB 2.0 Hi-Speed device for plugging a printer

- LED:** Power ON
- USB port** for plugging a service key or a memory stick. to transfer data to the IFFS memory
- cab provides specified **USB cables** for power supply. Lengths are 1.8 m to 16 m

Label printers guiding materials aligned to the left

Optimum printing in matters of different widths and materials

Slim ones

for printing small labels

| Label printer | | SQUIX 2 | |
|------------------|-----------|---------|------|
| Print resolution | dpi | 300 | 600 |
| Print speed | mm/s max. | 250 | 150 |
| Print width | mm max. | 56.9 | 54.1 |

Universal ones

Best-selling industrial units, providing a wide range of accessories

| Label printers | | SQUIX 4.3 | | SQUIX 4 | |
|------------------|-----------|-----------|-------|---------|-------|
| Print resolution | dpi | 203 | 300 | 300 | 600 |
| Print speed | mm/s max. | 300 | 300 | 300 | 150 |
| Print width | mm max. | 104 | 108.4 | 105.7 | 105.7 |

A cutter can be provided integral to a basic unit.

Wide ones

for printing Odette, UCC and GS1 labels in logistics operations

| Label printer | | SQUIX 6.3 | |
|------------------|-----------|-----------|-------|
| Print resolution | dpi | 203 | 300 |
| Print speed | mm/s max. | 250 | 250 |
| Print width | mm max. | 168 | 162.6 |

Extra wide ones

for printing pallet and drum labels

| Label printer | | SQUIX 8.3 | |
|------------------|-----------|-----------|--|
| Print resolution | dpi | 300 | |
| Print speed | mm/s max. | 150 | |
| Print width | mm max. | 216 | |

Direct thermal printers guiding materials aligned to the left

Basic unit

Peel-off unit

The precise and flexible ones

All materials that are wound on rolls or reels can be printed, so can fanfold ones. Very small labels or slim continuous materials such as pressed tubes are typical applications.

A specified sensor allows round or oval hoses as high as 5 mm be labeled.

| Label printer | | SQUIX 4.3 M SQUIX 4.3 MP | | SQUIX 4 M SQUIX 4 MP | |
|------------------|-----------|-----------------------------|-------|-------------------------|-------|
| Print resolution | dpi | 203 | 300 | 300 | 600 |
| Print speed | mm/s max. | 300 | 300 | 300 | 150 |
| Print width | mm max. | 104 | 108.4 | 105.7 | 105.7 |

cablabel S3 software

Design, print, administrate

cablabel S3 opens up the full potential of cab devices. Defining a label is first. Modular design adapts cablabel S3 to requirements step by step. Plug-ins are embedded. Native JScript programming, for example, is supported by the JScript Viewer. The designer user interface and JScript codes synchronize in real time. Optional features can be integrated, such as the Database Connector or barcode verifiers.

Stand-alone operation

This operating mode enables a printer select and print labels while not connected to a host system. Labels can be designed using software such as cablabel S3 or a text editor on a PC. Label formats, texts, graphics and data of a database can be stored on a memory card, a USB stick or a printer's IFFS memory. Only variable data are sent by a keyboard, a barcode scanner, a scale or any other host system to a printer, or be recalled by the Database Connector from a host and printed.

Rewinding, unwinding

with or without the use of a cardboard core

RG guide plates enable labels be rewound internally on peel-off units. A guide plate therefore replaces the peel-off plate.

External ER4, ER6 rewinders, power supply built in. Label webs wound outside or inside are wound consistently and tight by electronic control, with the help of a pendulum arm. They operate also with printers other than cab.

External ER1, ER2, ER3 rewinders for printer assembly using screws. Label webs wound outside or inside are wound consistently and tight by electronic control, with the help of a pendulum arm.

External EU unwinders. Even heavy rolls are fed consistently. Label webs wound outside or inside can be operated.

Printer control

Drivers

cab provides drivers to control a printer with software other than cablabel S3.

Free download on www.cab.de/en/support

Programming

JScript

cab printers embed JScript language. Download free manual on www.cab.de/en/programming

abc Basic Compiler

Integral to the firmware, abc in addition to JScript enables advanced programming before data are edited for printout. For example, external printer languages can be replaced without intervening in a print job in progress. Data may be imported as well from other systems such as scales, barcode scanners or PLC.

Integration

Printer Vendor Program

cab as a member of this program developed a replace method for controlling cab printers from SAP[®] R/3 using SAPScript. Only variable data are sent by a host system to a printer. They add on the printer to local images and fonts (IFFS, memory card, etc.).

Printer administration

Configuration in the Intranet and Internet

Integral HTTP / FTP servers enable a printer be controlled or configured, firmware be updated and memory cards be administrated using standard applications such as a web browser or a FTP client. Administrators and operators on behalf of SNMP / SMTP are notified of states, alerts and errors by email or SNMP diagrams. Time and date are synchronized by a time server.

Database Connector

Printers in a network may access data from a ODBC / OLEDB database and print it on labels. Data can be rewritten to a database while print jobs are in progress.

S1000 applicator

Apply labels in real time

S1000 attached to a SQUIX peel-off printer is economic, whether operated semi-automated or integrated in vertical orientation to a manufacture plant. Labels are applied to an item by a stroke cylinder.

- 1 Long life cycles
- 2 Different levels of application
- 3 Compressed air regulation
- 4 Reliable processes
- 5 A wide range of sizes
- 6 Supporting air
- 7 Pad

Pre-dispense

Label applications can be verified by the touch of a button. Printing is triggered on a first touch and the printed label is transferred to the applicator. The label is applied on a second touch.

| Applicator | | S1000-220 | S1000-300 | S1000-400 |
|---|----------------------------------|--|-----------|-----------|
| Operated with | | SQUIX 2, SQUIX 4.3, SQUIX 4 SQUIX 4.3 M, SQUIX 4 M, SQUIX 6.3 | | |
| Cylinder stroke | mm | 220 | 300 | 400 |
| Stroke of a pad as calculated below a unit | mm | 64 | 144 | 244 |
| Compressed air | bar | 4.5 | | |
| Performance | labels/min approx. ¹⁾ | 25 | | |

S3200 applicator

Apply labels in real time

S3200 attached to a SQUIX peel-off printer is economic, whether operated semi-automated or integrated to a manufacture plant. Printed labels are set 45° to 95° to the horizontal by a rotary cylinder and applied automatically to an item by a short stroke cylinder.

Life cycles, pre-dispense, compressed air regulation, reliable processes and supporting air correspond to S1000 (see page 22).

| Applicator | | S3200 |
|-------------------------------|----------------------------------|--|
| Operated with | | SQUIX 2, SQUIX 4.3, SQUIX 4, SQUIX 4.3 M, SQUIX 4 M |
| Rotary cylinder | | 45° - 95° |
| Stroke cylinder | mm max. | 30 |
| Depth F of a pad immersing | mm max. | 5 |
| Compressed air | bar | 4.5 |
| Performance | labels/min approx. ¹⁾ | 20 |

¹⁾ calculated using labels 40 mm high and a print speed of 100 mm/s

Demand modules

S5104, S5104 M, S5106 demand modules

Items can be labeled in motion on a conveyor. A product sensor detects the target position of a label. While a label is peeled off, the next one is printed. The speed of transport has to match with the speed of printing. A reflective sensor monitors positioning. A label sensor can be included or not.

| Demand module | | S5104 | S5104 M | S5106 |
|---|----------------------------------|--|--------------------------|-----------|
| Operated with | | SQUIX 4.3 SQUIX 4 | SQUIX 4.3 M SQUIX 4 M | SQUIX 6.3 |
| Label width | mm | 25 - 116 | 4 - 110 | 50 - 176 |
| Label height | mm | 25 - 210 | 10 - 210 | 25 - 210 |
| Distance of initial print line to the peel-off plate | mm | 336 - 518 | | |
| Surface of an item | | flat | | |
| Height of an item | | fixed | | |
| State of an item at the moment a label is applied | | in motion (speed adapted to printing) | | |
| Performance | labels/min approx. ¹⁾ | 60 | | |

¹⁾ calculated using labels 100 mm high and a print speed of 100 mm/s

Tube labeling

AXON 2 tube applicator

Cable labeling

WICON wrap-around applicator

Maintenance

Label sensors

They can be unlocked by touch and pulled out for cleaning

Print heads

They are easy to replace in few steps. In general, no adjustments are required

Print rollers

They are quick and easy to loosen for cleaning or removal using a screw

All-purpose tool

It is provided close at hand on a unit for replacing components and assembling periphery

Service

Trained cab technicians support worldwide in maintenance and repair

Trainings

Refresh your know-how of cab devices with regard to efficient operation service and repair

Thermal transfer printer for cable and wire identifications

Industries served

Our Hotmarkers have been widely used for cable identifications across many manufacturing industries including:

Control panels / Switchgear
Wire harnesses
Industrial installations
Heavy electrical machinery
Aircraft / Shipbuilding
Railway vehicle / Automobile

Key features

You can produce different kinds of cable marker sleeves effectively, as you need. SP8600 can automatically mark and cut various types of tubes. Marking speed increased by about 10% (as compared with previous model SP6600)

Applicable tube size:

Outside Diameter: 2.0~28.0 mm
Laid-flat width: 3.2~45.0 mm

SP8600

Stand-alone use

Optional keyboard allows stand-alone operation through menu screen on the LCD.

PC-link function

Bundled software "CTKPCMS" enables you to:

- Handle marking data efficiently with on-screen previews and error windows.
- Utilize Windows' TrueType fonts for marking native characters, etc.
- Print Code 39 barcodes.
- Transfer marking data to SP8600 with a USB flash drive.

Hot Stamp Marking & Thermal Printing

Advantages of Hot Stamping Printers

- Low running costs
- long-lasting and legible markings
- high durability and long lifetime
- Capable of marking a wide range of plastic molded items (bundling bands and connectors, control cables, and coated electric wires)
- Easy maintenance
- No drying time required, since liquid ink or organic solvents are not used.
- Operation panel updated to reduce unintended contacts
- Emergency stop button and two-button operation
- Foot switch continues to be an option

**HOTMARKER®
B330P**

Leather for Apparel, Shoe making

HANDYANDY

The Handy Andy X is a fully programmable dot-peen marking machine.

The EASY-TO-USE machine can automatically apply serial numbering, date codes, job numbers, lot numbers, and even company logos. The PC software works with Windows® (Xp and newer versions) and is easy to understand and operate.

Features

1. Marking head with metal pin housing, and cabide pin
2. Bench-top stand with T Slot mounting for fixturing parts
3. FRL - Filter, Regulator, Lubricator, and safety lockout compressed air preparation system
4. Windows software included free of charge for use with customer provided PC

Specifications

Power - 110v AC

Compressed Air - 30-60 psi

Operating System - PC Windows (required, not provided with unit)

Marking Window - 3.15" x 1.97"

Weight - 30lbs

STAINLESS STEEL MARKERS & TAGS

Print your own tags on 316 stainless steel and apply with Tie-Lok® Ties.

| Material | Height | | Length | | Thickness | | Package Weight | | Package Quantity |
|----------|--------|------|--------|------|-----------|-----|----------------|----|------------------|

STAINLESS STEEL MARKERS & TAGS: A comprehensive range of Stainless Steel Marking System is available for effortless and permanent identification of cable accessories or ducting system, even in harsh environments

- Tags are available in Stainless Steel Grade 316 & Alumanium
- We can also manufacture Tags of special characters & on Arabic text.
- Stainless steel marking system available in engraving & laser printing process.

Fiber Laser Marking Machine 20W

Hispeed MOPA version fiber laser marking machine integrates a MOPA (Master Oscillator Power Amplifier) laser source for better marking performance in plastic materials. MOPA fiber laser sources allow users to select (in addition to conventional power, speed and frequency settings) the laser pulse width. It is especially useful when marking some plastic and other very sensitive materials to thermal processes thereby obtaining a final result with more quality and greater contrast.

CO2 Laser Marking Device Laser Marking Machine 30W

CO2 laser marking machine adopts the most advanced CO2 RF laser generator and high speed galvo scanner system. With high quality optic devices, high stability laser generator full automatic control system. The machine system working with high precision and fast speed, very stable performance can work continuously for a long time and can be applied directly in large quantities of online processing lines.

Precision UV Laser Marking Machine

This equipment is a special cutting equipment designed by using laser technology and numerical control technology. It has the characteristics of stable laser power, good beam pattern, high peak power, low cost, safety, stability, and simple operation. This machine is a standard machine, and can be equipped with automatic or film-to-film, roll-to-film.

Application industry

Used in PCB and SMT industries. FPC soft board cutting, drilling, PCB circuit board sub-board cutting, camera module cutting, fingerprint recognition chip cutting, semiconductor cutting, etc.

COLOR GUIDELINES

| Content Type | Description | Required Colors | Example |
|------------------------|--|-----------------|--------------------|
| FLAMMABLE | Fluids that are a vapor or produce vapors that can ignite and continue to burn in air. | Black on Yellow | → HYDROGEN → |
| COMBUSTIBLE | Fluids that may burn but are not flammable. | White on Brown | → ACETIC ACID → |
| TOXIC/CORROSIVE | Fluids that are corrosive or toxic or will produce corrosive or toxic substances. | Black on Orange | → NITRIC ACID → |
| FIRE QUENCHING | Water and other substances used in sprinkler fire-fighting piping systems. | White on Red | → HALON → |
| OTHER WATER | Any other water except for water used in sprinkler & fire-fighting piping systems. | White on Green | → BOILER WATER → |
| COMPRESSED AIR | Any vapor or gas under pressure that does not fit a category above. | White on Blue | → COMPRESSED AIR → |
| OTHER | Definable by user. | White on Purple | → OTHER → |
| OTHER | Definable by user. | White on Black | → OTHER → |
| OTHER | Definable by user. | Black on White | → OTHER → |
| OTHER | Definable by user. | White on Gray | → OTHER → |

How to place labels for maximum visibility

Pipe marking labels should be positioned in such a way that they are visible from most people's line of sight

A few guidelines about visibility/ placement are:

- * The label should be visible from the point of normal approach
- * The label should be visible at every entry point in the floor or wall
